Project method

Developed September 2014 Bespoke MCA compliant care record keeping training. Identified a need within care homes, the ability for them to demonstrate that they apply the MCA 2005 within practice, and that care and protection plans are clearly based on MCA principles.

Project results/evaluation

Bespoke training and support has been delivered within 15 care homes in Barnsley. A process of evaluation (3 months after the training) has been developed to identify whether the training has met the outcome, and also gives further feedback to the Care Homes on progress re implementation of the MCA in practice within the home and support the development of an action plan. This training has now been requested within our acute hospital setting and hospice within Barnsley.
