

Difficult Situations: *Problems related to using the toilet*

Activity

Think about what you need to do in order to successfully use the toilet.

How many steps are involved in this activity?

Try to identify each specific thing you have to do, from start to finish, in order to go to the toilet.

Step one: recognising that you need to go to the toilet

through to...

Final step: leaving the toilet afterwards

A person with dementia could experience difficulty with any one, or more than one of these steps. Understanding the specific problems faced by individuals can enable us to provide the assistance that's needed.
