A software house was engaged to process a MCA/DoLS training package into an eLearning module. With the support of the programmer the look of the package and level of interaction for the user was developed as well building in quizzes and fail-safes to ensure the staff member is truly engaged in the module and to maximise retention.

## Project results/evaluation

The training compliance across the organisation is gradually increasing month on month as staff complete the module.

## Project area classification

Hospital care		Emergency care	
GP care		Dementia	
Social care		Learning disability	
Voluntary sector		Other mental health	
Financial services		Palliative care
