

Dementia: supporting people with
dementia and their carers

Costing template

Implementing NICE-SCIE
guidance in England

November 2006

**National Institute for
Health and Clinical Excellence**

**Cost impact of the NICE guideline on
How to use this costing template**

Step 1. Select local population

Introduction

This report aims to help organisations in England plan for the financial implications of implementing NICE clinical guideline on Dementia

Estimates of both the national and local cost impact based on assumptions made about current practice and prediction of how current practice might change following implementation are included. You are able to modify the assumptions and variables, using the instructions below, to tailor the local cost impact to your circumstances.

To select a population that is a percentage of a strategic health authority

- Rows 317–344 contain figures for each strategic health authority. Adjust the ‘%’ column in these rows to obtain the relevant percentage of the strategic health authority population.

For service providers that serve a number of different PCTs

- Varying proportions of a number of PCTs can be entered. An example of a situation where this method may be useful is, say, if United Bristol Healthcare Trust served 100% of the population of North Bristol and 20% of Bath and North East Somerset.

If you know your population, or if you have more recent prevalence figures

- A population figure can be entered into cell F369.

Printing a local population page

To print just a record of the population selected, without the rows that are set at 0%:

- click on the down arrow to the right of the ‘Selected’ heading.
- select ‘(Custom...)’ - This displays the Custom Autofilter box. Select ‘is greater than’ in the top left field from the drop-down menu and key ‘0’ into the top right field. Then click the OK button then print.

To re-display all rows, click on the down arrow to the right of the ‘Selected’ heading and Select ‘(All)’.

- select '(Custom...)' - This displays the Custom Autofilter box. Select 'is greater than' in the top left field from the drop-down menu and key '0' into the top right field. Then click the OK button then print.

To re-display all rows, click on the down arrow to the right of the 'Selected' heading and Select '(All)'.

Step 2. Adapt the costing template to reflect local circumstances

To adapt the costing template click on the tab at the bottom of the screen that says 'STEP 2. Costing Assumptions'. The worksheet is divided into three sections:

The left section

The left section describes the model developed – some of these fields contain references to footnotes that indicate the data source or how the assumptions had been made.

The middle section

This section contains the model used to estimate the national cost of implementing the guidance. Figures in this section represent the estimated national average.

The right section

The population selected in step 1 will be used for the calculations in this section and the other variables are initially set the same as the national model. The worksheet is protected to prevent formulae being inadvertently changed, but any shade cell can be changed to reflect local circumstances. For example:

Prevalence and incidence

If more detailed statistics about local prevalence and incidence are available, these can be used in place of the national estimate.

Activity costs

The national tariff has been used for activities such as outpatient attendances and admissions. This has been uplifted by the average market forces factor (1.1208) for figures based on 'Payment by Results', but individual areas of the country will be subject to different uplifts.

Step 3. Review the costing report

To view the costing report click on the tab at the bottom of the screen that says 'STEP 3. Costing Summary'. This worksheet summarises the national and local costing template without the detail of the calculations. It also contains information about how this tool was developed, and other costing issues relevant to the topic that should be considered.

The description of the locality entered in step 1 is used in the title for the local costing report, but this cell can be updated independently if required. You may wish to print this sheet and use it as a briefing report to discuss the costing exercise with non-finance staff, or as part of a business case for funds for implementation.

This document is written in the following context

This costing template and costing report represents the view of the Institute, which was arrived at after careful consideration of the available data and through consulting healthcare and finance professionals. It should be read in conjunction with the NICE guideline. This document is an implementation tool – it indicates the likely cost of fully implementing the guidance, but these costs are not absolute figures. Assumptions used in the report are based on assessment of the national average. Local practice may differ from this, but the template can be adapted to reflect these differences in order to estimate the cost of implementing the guidance locally.

Cost impact of the NICE guideline on Dementia

Costing summary

The annual revenue costs of changes arising from implementing the guideline are summarised below for the national population and for the selected PCT population(s). Two sets of PCT costs are shown below; one shows the costs incurred following the standard assumptions included in the cost report, the other shows the costs incurred after local assumptions are taken into account.

	National population Standard assumptions	Selected population	
		Standard assumptions	Local assumptions
Estimated costs of implementing guideline	£millions	£	£
Costs			
Carers offered psychological therapy			
Current provision	21.89	0	0
Future provision	49.24	0	0
Resource impact	27.35	0	0
Structural imaging			
Current provision	11.52	0	0
Future provision	31.72	0	0
Resource impact	20.21	0	0
Savings			
Electroencephalogram			
Current provision	7.50	0	0
Future provision	0.56	0	0
Resource impact	-6.94	0	0
Net cost impact of implementing dementia guideline	40.62	0	0

Cost impact of the NICE guideline on
Dementia

Assessment of sensitivity costs to a range of variables

Parameter Varied	Baseline value	Minimum value	Maximum value	Baseline cost £000s	Minimum cost £000s	Maximum cost £000s	Change £000s
Prevalance of dementia	665,773	599,196	732,350	40,730	37,987	43,473	5,486
Cases eligible for scanning	222,135	199,922	244,349	40,730	39,400	42,060	2,660
Unit cost of CBT session	£488	£399	£582	40,730	36,298	45,411	9,113
Unit cost of MRI scan	£345	£204	£577	40,730	35,943	48,620	12,677
Unit cost of CT scan	£181	£117	£214	40,730	37,716	42,295	4,579
Unit cost of EEG scan	£226	£168	£281	40,730	42,505	39,022	-3,483
Proportion of carers currently receiving psychological therapy	11.0%	6.0%	16.0%	40,730	50,703	30,757	-19,946
Proportion of carers identified with psychological distress	33.0%	23.0%	43.0%	40,730	25,771	55,689	29,918
Proportion of people suitable to be scanned	85.0%	80.0%	90.0%	40,730	41,409	40,051	-1,358
Proportion of people currently being scanned using MRI	2.0%	1.0%	3.0%	40,730	41,381	40,079	-1,302
Proportion of people estimated to be scanned using MRI	20.0%	15.0%	25.0%	40,730	37,474	43,986	6,512
Proportion of people currently being scanned using CT	30.0%	25.0%	35.0%	40,730	42,438	39,023	-3,415
Proportion of people estimated to be scanned using CT	55.0%	50.0%	60.0%	40,730	39,023	42,438	3,415
Proportion of EEG carried out	15.0%	10.0%	20.0%	40,730	43,048	38,412	-4,636
Proportion of EEG continuing to be undertaken	7.5%	5.0%	10.0%	40,730	40,542	40,918	376

Where to find the guidance

You can download the following documents from www.nice.org.uk/CG0042

- The full guidance for this clinical guideline.
- A quick reference guide, which has been distributed to healthcare professionals working in the NHS in England.
- A version of the guideline for people with Parkinson's disease and their carers ('Understanding NICE guidance').

For printed copies of the quick reference guide or information for the public, phone the N Response Line on 0870 1555 455 and quote:

- N1052 (quick reference guide)
- N1053 (information for the public).

Other implementation tools are available from www.nice.org.uk/CG042

- implementation advice
- a slide set.
