Understand the Job: Working Together

Effective communication is vital in health and social care. Use this activity to learn more about the communication skills you will be using in your job.

First, write your name and today’s date on the line below.

(First name)               (Last name)                                 (Date: Day-Month-Year)

-------------------------------------------------------------------------------------------------------------------------------------

1. Look at this
Care is done in partnership with others.

The care partnership

- advocates
- significant others
- family
- other care workers
- you
- social worker
- doctor / nurse
- therapists
- care manager

2. Now consider three questions
- What would you say was the shared goal of the care partnership?
- Each person in the partnership has a role to play. All roles are equally important. Is this true? Why?
- "Good relationships are at the heart of care." Easy to say. What does it mean?

3. Did you know?
Here are two statements from a code of practice for care workers:

“Social care workers must strive to establish and maintain the trust and confidence of service users and carers.”

“Social care workers must uphold public trust and confidence in social care services.”

When would trust between a carer and a service user be important?
What about trust between two carers?
What might happen if the public lost confidence in our care service?
